Otto Vilo

have a decade of experience in high-velocity tech environments, bridging the gap between complex engineering and commercial growth. My expertise lies at the intersection of business logic and product architecture; I leverage a background in shaping product roadmaps and an understanding of full-stack systems to translate technical capabilities into high-value contracts.

SR DIGITAL MARKETING CONSULTANT
Teleperformance S.A.U - BOP for Google LLC, Barcelona | October 2024 – Ongoing

Consulted and implemented fast-paced digital advertising solutions for numerous Finnish growth companies, ensuring high customer satisfaction and rapid time-to-value. Consistently achieving top-tier target attainment and leading to accelerated promotion within 1 year.

PRODUCT OWNER
Delitaz Oy | April 2022 – October 2024

Expert in Network Expansion: Successfully built and managed a shop-in-shop solution, acquiring venues, events, and clubs as new selling partners, demonstrating expertise in the sub-merchant model. Secured partnerships by selling local applications also in the hospitality sector, leveraging industry experience to expand business offerings.

PROJECT MANAGER, PRODUCT SPECIALIST
Hurja Solutions Oy, Kuopio | 2016 – 2022

Led the execution of multiple complex software projects, utilizing strong negotiation skills and communication to resolve delivery obstacles and objections between technical teams and clients. Product specialist on several internal products.

Master of Science (M.Sc.) - Computer Science
University of Eastern Finland

Thesis focused on Sustainable Software Engineering, providing insight into operational efficiency and large-scale process optimization. Minor in marketing.

High-Velocity Account Execution

This data demonstrates consistent success in f B2B sales, managing high-volume pipelines, driving contract negotiations for client investment growth. Independently booking and executing consultative meetings, and strategically pitching proprietary offerings that required successful upselling as performance-boosting upgrades to existing accounts.

Pace & Pipeline Ownership: I drove 374 successful full-cycle implementations over four quarters, directly managing pipeline generation by independently booking and executing all consultative pitch meetings. Over 600 meetings within a year.

Target Outperformance Under Pressure: I achieved an average quarterly implementation rate of 104 % of target across the year, with targets being continuously and aggressively adjusted upwards in proportion to required client investment increases. Quarterly performance included exceeding Q1 by 13%, delivering a high-volume 97 implementations in Q2 against the demanding 118 target, and exceeding Q3 2% over and Q4 10 % over before end of year.

Value Creation & Upselling: My efforts generated over €3.5 Million in attributed annual revenue, highlighted by successfully negotiating by securing upsells of complex performance-boosting upgrades.

Competitive Network Acquisition & Value Delivery

This section validates your expertise in **c**ompetitive acquisition, building partner trust, and creating sustainable network economics**I.** My focus was on market share capture by delivering superior account value and negotiating sustainable economics for partners. This strategy resulted in acquired merchants becoming highly valuable, irreplaceable assets within the Finnish event and venue market.

Market Capture: Successfully acquired 60+ national sports clubs and event merchants directly from larger, established competitors, achieving 100% growth in the product's launch year.

Value Proof: The trust and value built were so substantial that a major competitor eventually paid a signing bonus to buy the partners back, providing irrefutable proof of the superior quality and stickiness of the acquisition and account management strategy.

Network Scale: Built a network of merchants capable of hosting over 1,500 events annually, facilitating the transaction of millions tickets**.** Successfully structured deals and managed the network to facilitate over €2 M being disbursed to partners, demonstrating the ability to establish the foundation of strong working relationships and sustainable partner economics.
